Academic Year	:	2025-26	Semester	:	3 rd
Course code	:	ITUE203	Course name	:	WEB DEVELOPMENT FRAMEWORKS

Practical - 6

AimStore submitted registration data in a PHP file and confirm submission.

1. Explain how the PHP POST and GET methods are used to submit registration data. Include in your answer how the data is captured from the form, processed, and stored, and discuss why one method might be preferred over the other in this scenario.

2. Describe the importance of input sanitization in form handling. Explain how improper handling of user inputs could lead to security risks and how PHP functions can be used to validate and sanitize data before storing or displaying it.
